# Diya Sheth

Syosset, NY| 516-450-8346 | ds2457@cornell.edu |linkedin.com/in/diyatsheth/

## EDUCATION

**Cornell University, College of Engineering** **Ithaca, NY**
*B.S. in Mechanical Engineering; Intended Minor in Entrepreneurship* *August 2024 - May 2028*
Coursework: Statics & Mechanics, Thermodynamics, Intro Python, Gen Chem, Physics Mechanics, Calc 1,2,3 Dynamics, Intro Mech E, Waves, Oscillations & Quantum Physics, Linear Algebra, Differential Equations, System Dynamics, Mechanics of Materials, Fluids

## TECHNICAL PROJECTS & WORK EXPERIENCE

**Organic Robotics Laboratory** **Ithaca, NY**
*Undergraduate Researcher* *Febuary 2026-Present*
- Built an anechoic tank system, testing layered wall damping to reduce sound reflection and improve acoustic performance
- Designing and building a small impedance tube system to test acoustic absorption across different damping materials
- Conducting acoustic materials research under Prof. Shepherd, applying mechanics of materials principles to sound damping design

**Strength Robotics** **Norwalk, CT**
*Founding Engineer* *May 2026- Present*
- Led investor and customer outreach for pre-seed fundraising, contacting 150+ prospects across fitness and healthcare sectors
- Managed biosensor integration, led a small team, and represented the company at industry networking events and conferences

**Cornell Assistive Technologies Project Team** **Ithaca, NY**
*Builder & Designer* *February 2025 - Present*
- Designed a Bluetooth-controlled mechanical clamp enabling independent emptying of a urinary drainage bag for a wheelchair user
- Created CAD models and physical prototypes, iterating on geometry, grip force, and usability constraints for one-handed operation
- Integrated electromechanical components to translate user input into controlled motion, prioritizing safety and reliability

**Brookhaven National Laboratory** **Upton, NY**
*Mechanical Engineering Intern* *June 2024 - August 2024*
- Gained hands-on experience in mechanical engineering workflows through direct mentorship from the project's lead engineer
- Conducted engineering research and contributed to the mechanical design of the $100M Electron-Ion Collider end cap project
- Engaged with 5+ hardware vendors (i.e. Enerpac) to understand hardware specifications and constraints for early-stage decisions

**Arduino-powered Robot Arm & Water Purity Sensor** **Syosset & Bethpage, NY**
*Individual Researcher* *September 2023 - June 2024*
- Designed an Arduino-controlled robotic arm with 3D-printed components and integrated motors/sensors for rehabilitative control
- Granted $500 by SAAWA & NYIT, the LI Science Congress Honors Award, and the Robert Nelson Memorial Award.

**Satakkit** **Syosset, NY**
*Co-founder & Chief Product Officer* *December 2023 - Present*
- Designed components in Onshape CAD and fabricated them using TPU 3D printing for flexible, user-safe assistive devices
- Created 30+ kits of flexible 3D pieces assisting Occupational Therapy Patients, senior citizens, and kids in stabilizing tremors.

## EXTRACURRICULARS

**Startup Consulting Cornell** **Ithaca, NY**
*President* *October 2024 – Present*
- Lead a student-run consulting organization, overseeing cross-functional teams delivering structured problem analyses for startups
- Developed organizational strategy, recruitment, and execution across multiple client engagements and project timelines

**Rockefeller University Cross & Rout Labs** **New York, NY**
*Research Intern | Prof. Frederick R. Cross (Cell Biology & Genetics and Genomics)* *May 2025 - August 2025*
- Improved the reliability of a complex experimental system by addressing plasmid instability, increasing consistency in nanobodies
- Designed and executed iterative experimental tests, refining protocols and system parameters to improve library expression yield

**FIRST Robotics Competition Team** **Syosset, NY & Bethpage, NY**
*Captain/Alumni* *September 2020 - June 2024*
- Led mechanical design and fabrication of the robot, assembling mechanisms using 3D-printed and fabricated components
- Integrated electrical subsystems, working with sensors, actuators, wiring, and basic electronics to support reliable robot operation

## SKILLS

Technical Skills: CAD (Fusion360, SolidEdge, Onshape, Solidworks), 3D printing & rapid prototyping (TPU, rigid filaments, laser cutting, hand tools, drill press, mechanical assembly), basic electronics (circuits, sensors, Arduino, breadboarding, multimeter), Python
Leadership: Team leadership, project coordination, technical communication, organizing and running meetings, public speaking
